Welcome to the Laboratory Manual for Chemistry In the annual process of selecting laboratory textbook for this course I have never been completely satisfied with available titles. Therefore, I have undertaken the task of writing a manual that will directly apply to this laboratory section. Work in the biochemistry laboratory involves the use of inflammable solvents, some corrosive and toxic chemicals, and apparatus which, if used improperly, can cause minor to severe injury. This Biochemistry laboratory seeks to model work performed in a biochemical research laboratory. The course will guide you through basic lab techniques, investigations into DNA.
